

## TRAVEL REQUIREMENTS AND PRECAUTIONARY MEASURES TO REDUCE THE SPREAD OF COVID-19

Due to the COVID-19 pandemic, **international guidelines have been published to reduce the risk of spreading COVID-19** on board our ships, during the embarkation, cruise and disembarkation phases and to provide additional precautionary measures to respond to any cases of potential COVID-19 among Guests.

According to these recommendations:

**Boarding will not be allowed** to guests undergoing dialysis, suffering from severe respiratory failure, who need oxygen therapy and who are unable to wear surgical masks.

**For those over the age of 65 or people with severe pre-existing medical conditions regardless of age** including ischemic heart disease, atrial fibrillation, heart failure, arterial hypertension, type 2 diabetes, chronic lung disease, chronic liver disease, chronic kidney failure, autoimmune diseases, obesity, cancer in treatment it is **always advisable to refer to their own doctor before proceeding with the booking, it being understood that everything indicated in the paragraph does not inhibit booking and boarding.**

All guests aged 2 and over, at the time of embarkation will be asked to show an official negative test result of an **antigen test swab** (or even RT-PCR molecular swab) **to be done within 48 hours from the boarding time.**

If your itinerary involves embarking in a **port in Greece**, the swab must be **done within 24 hours of boarding time.**

For itineraries that include Spain, **temperature checks at the beginning and middle of the cruise is mandatory.**

As required by the passage ticket contract, the travel agency remains responsible for verifying the entry requirements in the individual countries.

In addition: at the time of boarding, on board and during excursions, passengers must act in compliance with the procedures relating to social distancing and safety protocols implemented by Costa Cruises.
